

## State of New Jersey

DEPARTMENT OF AGRICULTURE  
HEALTH / AGRICULTURE BUILDING  
PO Box 330  
TRENTON NJ 08625-0330

CHRIS CHRISTIE  
*Governor*  
KIM GUADAGNO  
*Lt. Governor*

DOUGLAS H. FISHER  
*Secretary*

April 17, 2014

David J. Rosen  
Legislative Budget and Finance Officer  
Office of Legislative Services  
State House Annex  
PO Box 068  
Trenton, NJ 08625-0068

Dear Mr. Rosen:

In response to questions from the Assembly Budget Committee, I offer the following information:

**What sources of funding are you considering to provide a long-term solution for funding the Farmland Preservation Program?**

The Department of Agriculture's role is to educate the Legislature and administration on the status of New Jersey's farmland preservation efforts and funding needs. We are aware that a number of ideas for a future funding source have been proposed and Legislature is evaluating those ideas in the context of New Jersey's overall budgetary demands. We stand ready to provide whatever supporting information that may be needed to assist the Legislature in those efforts, which will be critical to sustaining farmland preservation beyond FY2015.

**What cost-efficiencies has the department recently implemented and what cost-efficiencies does the department plan to implement in the next fiscal year and beyond?** *See attachment 1*

**Please provide a list of schools and school districts in the State that dropped out of and no longer participate in the school breakfast or school lunch programs.** *See attachment 2*

**Please provide a list of schools and school districts in the State that participate in the Breakfast After the Bell program.** *See attachment 3*

Feel free to contact me should you need further information.

Sincerely,

Douglas H. Fisher

## Question #2 – Efficiencies

### **Division of Food & Nutrition**

Our School Nutrition Programs converted to a web-based system in 2006. This has allowed for the electronic communication of messages & memos to sponsors, as well as an electronic reimbursement process. Prior to the system, sponsors would mail vouchers to our office, and staff would manually scan and verify for payment.

Food Distribution has also utilized the system referenced above in communicating and compiling USDA Food allocations to schools. Prior to 2013, this was a paper process – documents were mailed and faxed, and then manually compiled.

Our Child and Adult Care Feeding Program is in production of a similar system with a vendor at present time.

### **SADC**

Electronic Submission of Monitoring Reports for Preserved Farms:

Pursuant to State Agriculture Development Committee regulations (N.J.A.C. 2:76-1 et seq.), every farm enrolled in the Farmland Preservation Program must be monitored annually by the State, county or nonprofit agency that holds the development easement to ensure conformance with the farmland preservation deed restrictions. The monitoring agencies are required to submit a written report on each farm by July 15th of each year. Since the preservation of the first farm in 1985, these submissions to the SADC have been in paper form with no standardized format. Using a computer program made available to all State agencies at no charge by the Treasury Department, the SADC utilized in-house information technology staff to customize the program to create a web-based monitoring form that captures a set of desired information, is available for use by all partner agencies, is pre-populated for the user with property specific data based on unique ID and PIN numbers, is available 24/7 to all partners and automatically uploads a user's submission to the SADC database. This system greatly increases the efficiency, quality and availability of data collected during these monitoring visits. Additionally, digital storage of data eliminates physical space storage requirements for the thousands of pages of paper records that otherwise would be submitted on an annual basis.

### **Markets**

The Dairy and Organic Registration system has introduced the concept of automated renewal process, which was quite labor intensive with the manual system. The online system is expected to produce faster revenue, as the user has the option to make online payments via a credit card or e-check. Inspectors have access to real-time data as they visit the locations for inspections.

**Public Schools**
